Zeropoint.IT

Zeropoint.IT offers managed software development outsourcing services to SMEs and large corporations in Western-Europe. With our consultancy force in Belgium and development team in Pakistan, we can offer European business quality with an interesting price tag. Zeropoint.IT has a specific interest in solutions based on Free Software, and is itself an example of how an SME can operate in over 4 countries relying only on Open Source software. This unique combination has proven it's success rapidly, as Zeropoint.IT employed over 15 full-time developers only 13 months after it started with it's offerings on the market.
